

BILOBA HINGES AVAILABLE FINISHES

We offer a wide range of finishes, each carefully monitored during the production process. The PVD process is possible thanks to nanotechnologies which allow the production of extremely thin coatings with special physical and mechanical features, such as corrosion and wear proof, but most importantly, ecologically efficient.

We also offer special finish options. Please contact your sales representative, or email your request to design@t-concepts.com.

1. PVD Physical Vapor Deposition: The PVD is a metal coating that ensures exceptional resistance to abrasion, resistance to oxidation, innovative and durable coloring.
2. Only for ESPRO system
3. Subjected to minimum order and/or fixed fee of \$175 USD. Minimum order quantity required. Upon request. Please ask our sales department for a quotation.
